## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following invention is required under 35 U.S.C. 121:

This application contains claims directed to the following patentably distinct species of the claimed invention: Claim 1-3 and 11-13 are directed toward a Dynamic memory device and method of selectively controlling a refresh cycle time. In this embodiment, memory cell array are being divided into a plurality of blocks, and a refresh cycle control circuit for dividing the block selection signals by preset frequency dividing ratios to set refresh cycles for the blocks. Claim 4-10, however, is directed toward a dynamic memory device having memory array being divided into plurality of hierarchical blocks and having controlled refresh operation. In this embodiment, memory array being divided into plurality of first hierarchical blocks and each of the first hierarchical blocks being further divided into a plurality of second hierarchical blocks. A refresh cycle setting circuit is then configured to set a first refresh cycle for the first hierarchical blocks and as second refresh cycle for the second hierarchical blocks, wherein the refresh cycle setting circuit comprises a first frequency divider for dividing the first block selection signal by a predetermined first frequency dividing ration; and a second frequency divider for dividing the second block selection signal by a predetermined second frequency dividing ration.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
